

School Tour Report

Empowering young people for a Safer Internet.

About

The goal of the school tour is to create online safety awareness in a 3 weeks activation where volunteers will visit 500 schools reaching 100,000 students simultaneously across Nigeria to facilitate online safety lessons and distribute online safety tool kits to schools and students.

Problem Statement

The widespread use of the Internet and new communication technologies has been a powerful engine for growth, learning and the creation of new jobs which has helped to improve the quality of life for many including young people as it provides them access to education, entertainment and skills for their future employability.

While the Internet is a great way to access quality content and services, it can also serve the purpose of ill-intentioned people. Globally, there are more than 2.2 billion people under the age of 18 years, making young people the biggest vulnerable group in our societies.

Solution

Educating young people on how they can navigate the internet to ensure they are protected, respected and empowered online.

School tour 2024

The school tour took place in **22 states in Nigeria between 1st of May - 15th of June 2024**. Through the school tour we were able to reach over **70,000 students in 437 schools** sharing online safety lessons and safety measures. Our volunteers covered 4 major topics which include:

- Unveiling The Depths Of Phishing: Techniques, Prevention, And Protection

- Digital Resilience: Empowering Young Minds Against Cyberbullying.

- Understanding Your Digital Footprint.

Location

The school tour took place in the following states in Nigeria:

Volunteers Feedback

Titus Hannah Oluwatosin (Virtually Safe Kogi state Team Lead)

The Virtually Safe School Tour has been nothing short of an educational adventure for my team and me. We are deeply grateful to the organization and the partners for the opportunity to learn alongside the students. This experience has enriched us in ways we never anticipated, fostering a deeper connection to the mission of making schools safer and more informed.

Assayomo Endurance (Team Lead,Lagos district 1)

Dear Virtually safe,
My team and I want to share our appreciation for the recent school tour. It was exceptionally well-organized and provided a wonderful insight into the tour. The tour went off without a hitch, and the positive feedback we've received from participants is a testament of the good work we did as it was both informative and enjoyable . Thank you for your unwavering support and for making this tour an exceptional experience for everyone involved.

Emmanuella Wilfred (Lagos State District 4 Representative)

As a Virtually Safe School Tour Volunteer, myself and an amazing team embarked on an enlightening journey. We extend our heartfelt gratitude to the organization Virtually Safe and all its partners for allowing us to learn alongside impacting students. This experience has unexpectedly impacted us, deepening our commitment to the mission of enhancing Online safety and awareness.

Dear Sir/Ma,

18th July, 2024

VIRTUAL SAFE-ONLINE SAFETY

We the above named school had privilege to receive your team in our school In May, 2024 to educate and sensitize our students about online safety for young people with needed information that can keep safe and secure when online.

The talk was really informative coupled with reading material on safety lesson distributed has positively impacted our students including teachers. The gift given to the school has helped the student intellectual development. Now they have in their fingertips 'dos and don'ts' as young people whenever they are online.

Furthermore, the debate competition has opened our students to a lot of information about dangers associated with online uses and how to be careful when using the internet. Some of them took part in the debate and did well. Kudos to the organizer, it will impact our society positively if promoted by schools that benefited from it.

We use this medium to thank the organizer of this programme.
